Price Term

EXW, FOB, CNF, CIF, LDP, DDU.

Lead Time

Stock products: 1-7days
 MOQ: 3-4 weeks working days
 Flexible production time for special urgent order.

Product Tolerances

Quantity: ± 10% of order QTY
 Size: ± 5mm Width & Length
 ± 0.002mm Thickness

Payment Methods

Deposit before mass production; balance before shipment.
 We accept T/T, PayPal, and Western Union.
 Flexible payment terms for VIP customers.

● **Professional Packaging Solutions**

With over 33 years' experience and constant research, Adsure Packaging make sure to provide our customers the best solutions. We are proud of our advanced production facilities, which enable us to always exceed your expectation!

● **Quality Assurance**

Adsure Packaging dedicates into producing the best quality bags. We have developed our own testing process that complies with ISO 9001, SGS, and will improve continuously.

Our testing equipments includes:

- OCR System
- Microscope
- Optical Density Meter
- Color Assessment Cabinets
- Missing No. Report System
- Film Falling Dart Impact Tester
- Tensile Strength Testing Machine
- Friction Coefficient Testing Machine
- Temperature Humidity Programmable Chamber

We are confident that with the high standard manufacturing and testing process, you can sure rely on our quality and durability.

● **Accept Customization**

Range: Material; Size; Printing.
 Add value: Free of artwork; Free of design; Free of different packaging solution before order.

APOP™ Markets Served

Adsure provides innovative bagging machinery, high-quality, system-matched bags, and exceptional customer service to some of the most demanding markets.

We have helped customers streamline their packaging operations, improve operation efficiency, saving labor and time cost; Output ratio maximization.

APOP™ Auto Pre-opened bags

APOP™ bags are the bags for automated packaging machines. We offer stock bags and can also take customized orders!

Apop™ Bags are perfect for reducing packaging cost and increasing packing efficiency, and will gradually replace the regular poly mailers.

Standard Features

1. Pre-Opened

3. Easy to open

5. Lasting inks, will not be blurred easily

7. Air hole: in Type "C" / Type "O"

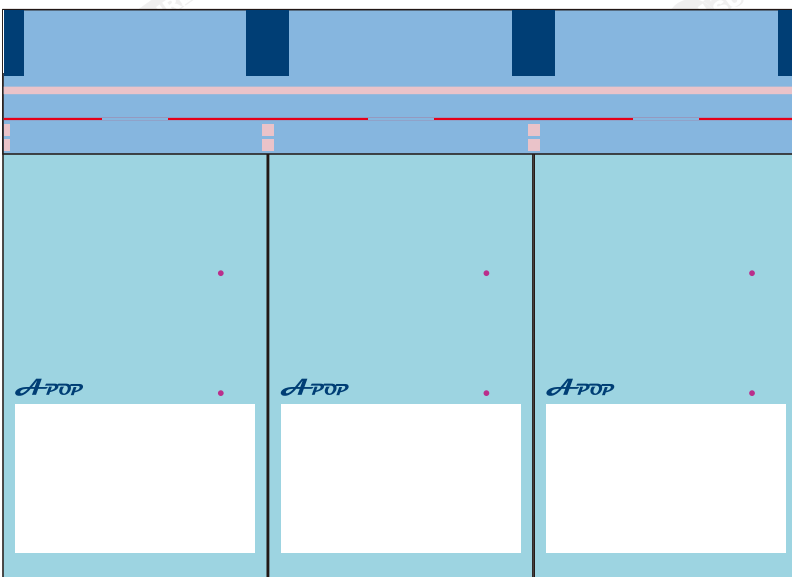

2. Perforation line

4. Good for thermal printing

6. On-roll / Fan-folded

8. Horizontal / Vertical perforation line

Side Load Bags

Side Load Bags

Bags pre-opened on one side, the products could be loaded easily. Reducing the cost of money and time, they are the perfect solution for manufacturers and distributors, who need a dependable supplier of top quality bags. Side load bags are designed specifically for use on high-speed Side Pouch baggers.

How to control the APOP™ bag quality

Only the best quality bags leads to your satisfaction. To ensure this, we keep improving our equipments during the mass production process, strive for the best quality until our customers satisfied with the product.

We know the best ways to exceed our customers' expectation is to keep innovating. Our professional R&D team focus on developing the new production process and products everyday. So far, we have already obtained over 12 patents, and will keep the hard work.

Opening Rate

We change the blades regularly, to make sure the best quality. All the bags are examine by our self-developed Online Detection System. We can always provide the examine report once our customers required.

Production Record

Record the connectors in each box of bags(strictly controls the amount of connectors in ≤ 2) Also records the Opening rate, Sealing firmness, Size, Burning Edge Temperature.

Opening Level

The inner surface is produced in different kind of materials, which will be much more lubricious. Thus we can guarantee the bags are really easy to open!

Connectors

We've invented our own repairing tool, which could perfectly reconnect the bags, and keep the baggers work without any problem.

Perforation Line Tearing Degree

We could customize the perforation line as our customers requires, by adjusting the coefficient of friction. Just to match your bagging machine!

Bag Tolerance

With our abundant experiences, we can predict the bag tolerance precisely, to make sure the bagging machines can work perfectly with our bags.

Custom printing

We know how important it is to stand out from other competitors, thus we provide custom printing solution.

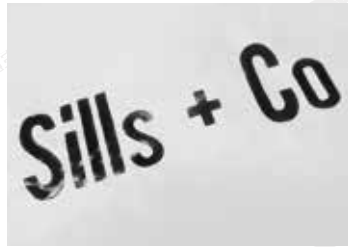

To make sure your unique brand identity will be printed accurately, we are able to print in up to 10 colors, in Gravure or Flexo printing.

Hot Stamping Process

Tyvek Material
Gold Foil Hot Stamping

Gravure & Flexo Plate Difference

A Gravure Printing

The smallest image size: 0.12mm.

Capable of printing the gradient colors and complex images.

The image could be fully printed on the bags.

Hard to see the pin dots with naked eye.

Carve the images and words on metal rolls.

Rather costly.

High printing speed.

VS

B Flexo Printing

The smallest image size: 0.2mm

The printed images will be rougher and simple.

Must have a 5mm blank space on each side, could print the image up to 80% on the bags.

Easy to see the pin dots with naked eye.

Emboss the images and words on resin plates.

Economical.

Regular printing speed.

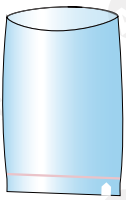

Custom Features

Need a more functional bag for your products? APOP™ can be customized with a variety of different features, just to meet your requirement. Below are some of the most common features.

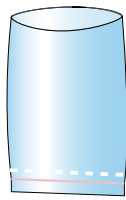

Custom Size

Bag Thick	10-250 Mil
Bag Width	2" - 36"
Bag Length	2" - 72"

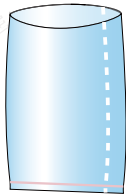

Perforations & Notches

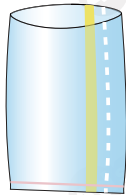

Tear Notch

Horizontal Perforation

Vertical Perforation

Self-Adhesive tape with perforation line

Vent Hole

Round

No Through-holes

Semi-circular

Crescent-shaped

Handle

Handle

half-moon

Arched

handle with easy perforation line

euro slot

Allotype

High-Integrity Seals

High-integrity side seals are 3/16" wide, creating a much stronger seal than a standard slit seal and also considered to be leak proof.

The Plug

The material of the plug is optional, metal or plastic.

Paper Plate

The thickness of the paper plate could be customized.

Paper Core

The length and the radius of the core could be customized.

Pre-open Perforation Line

According to different machine's bagging tension, setting different pre-open perforation line to meet it.

Self-Adhesive tape with perforation line

The customers could open the package easily with the perforation line. And they can also use the self-adhesive tape to reuse the bag once they want to return the package.

Tear Notch

A tear notch allows a bag to be easily opened by the customer. The tear notch can be in the side of the bag or in the skirt (for pre-opened bags on a roll).

Vent Hole

Vent holes bags eliminate trapped air to reduce the volume of the package, allowing more finished bags to fit in a case. Vent holes are typically 1/8" to 1/4" diameter.

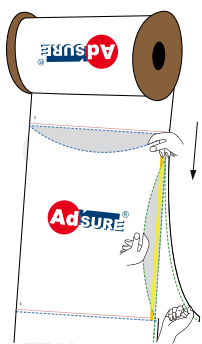

Hang Holes

Hang holes style bags allow a package to be placed on a retail display hook. The hang hole is usually near the top of the bag and is Headers allow a sealed bag to have a hang hole in it. The header often used in conjunction with a header seal.

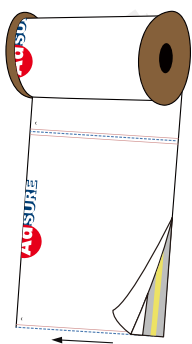

Bi-ex Bags

Duplex bags are clear material on one side and colored material on the other, typically white. The print on the colored material is very legible, (for a bar code), while the contents are still visible.
